The project will be implemented in Arua, Kyenjojo and Kyegegwa Districts focusing on addressing drivers of risk. The main drivers as analyzed by stakeholders are poor governance, increased population pressure on natural resources and gender inequality. Therefore the program will focus on addressing root causes of environmental degradation, asset base of the communities and refugees to cop up with climate variability and change, conflict and displacement, youth exclusion and limited engagement with private sector-led innovations.

The Program will promote an inclusive humanitarian and development approach that will lead to the economic empowerment of women and youth in refugee and host communities and improve governance of Natural resources; the programme will equip the target group with adaptive capacities against climate change and environmental degradation while facilitating peaceful co-existence and social cohesion among Refugees and host communities in the regions of Arua, Kyegegwa and Kyenjojo; the program will strengthen the capacities and assets of vulnerable households, in particular women and youth, to deal with shocks through a range of approaches, and successful models such as community-based adaptation (CBA) strengthening collectives for resilient livelihoods and financial inclusion, Community-Based Monitors (CBM) ensuring participation at community level, and the Inter-District Forums- as a multi-stakeholder space, serve as the foundation of the Strengthening Resilience program.

### **OBJECTIVES:**
